CHIX

CHICAGO INTERNET EXCHANGE

www.unitedix.net

UNITED
INTERNET EXCHANGE

OUR MISSION

We are driven to create the most efficient and resilient interconnection platforms, utilizing the most advanced technologies, and grounded in our core values of neutrality and transparency.

We were formed to provide high-performance, next-generation interconnection services to our customers.

NEXT-GENERATION INTERCONNECTION

United IX is built using HFT technology originally developed for high-performance trading networks.

We offer:
- **European model Internet exchange**
- **Fully-automated private VLANs between customers**
- **Private VLANs for selling services**
  - Transit
  - VoIP
  - DDOS Mitigation

BENEFITS OF PEERING

CHOICE OF CONNECTIVITY OPTIONS

The United IX Chicago infrastructure is currently housed in three data centers with a secure and controlled environment and over 15 active peers

REDUCTION OF CONNECTIVITY COSTS

United IX offers internet traffic exchange points where participants/ peers may avoid the need for extensive commercial transit costs to reach one another

BENEFITS OF PEERING

INCREASED REDUNDANCY

By adding multiple routes to peers, you increase the redundancy in your network

SECURITY

Real time Blackholing DDoS Mitigation

LATENCY

By exchanging internet traffic closer to consumption in diverse geographies, networks can create high efficiency

BUSINESS OPPORTUNITY

We are a next generation interconnection platform providing a data center-neutral network in the greater Chicago region. With established active peers in our initial locations, and increased demand from existing and future customers, we are expanding our footprint to select data centers.

CHIX OVERVIEW

LOCATIONS

350 Cermak 5th floor
350 Cermak 2nd Floor
603 Discovery Drive
427 LaSalle (Coresite)

Route servers: **yes**

rs0: **CentOS-bird 1.4.3**
